SUMMARY

Full-Stack Web Developer with hands-on internship experience, developing +3 full-stack web applications using Angular, React.js, Laravel/PHP, and MySQL. Engineered +10 RESTful API endpoints, implemented authentication, and connected client-side interfaces with server-side logic. Collaborated with cross-functional teams to develop e-commerce and management systems, demonstrating strong teamwork and continuous learning. Designed all projects with clean code principles and scalable architecture.

SKILLS

Frontend Angular, React.js, Redux, HTML5, CSS3, JavaScript (ES6+), TypeScript, Bootstrap, jQuery, Responsive Design, Single Page Application (SPA)

Backend Laravel, PHP, MySQL, RESTful APIs, Authentication & Authorization, CRUD Operations

Tools Version Control (Git), GitHub, Postman

Languages Arabic, English

EXPERIENCE

Full-Stack Developer Intern

Mar '24 — Jul '24

Wazeefa Tech Initiative | Petra Software

- Constructed 3 full-stack applications using Angular, Laravel/PHP, and MySQL. Completed internship supervised by the Ministry of Communications and Technology and ITI at Petra Software Company.
- Engineered +10 RESTful API endpoints to handle core application logic and ensure seamless data exchange.
- Implemented secure authentication and role-based authorization for 2 distinct user types.
- Contributed to full-stack projects under the guidance of senior engineers, implementing core features and integrations.

PROJECTS

Furniture Store Website

Present

- Building a full-stack furniture ordering web application with admin dashboard for managing products, orders, and users.
- Implementing real-time order tracking with live location updates, enhancing customer experience.
- Integrating secure login system with role-specific permissions for customers and admin.

Bike Rental Website [Link](#)

- Constructed a bike rental platform with a user-facing interface and an admin dashboard.
- Implemented a role-based access control system supporting 2 user roles.
- Integrated Laravel-based RESTful APIs with an Angular frontend to enable dynamic user interactions and real-time data updates.
- Secured application transactions by integrating token-based authentication and authorization protocols.
- Designed the database schema for rentals and user management.

Green Store Website [Link](#)

- Created an adaptive e-commerce platform with product listings and admin dashboard.
- Built backend functionality in PHP, including full CRUD operations.
- Integrated Angular frontend with backend APIs for interactive operations.
- Optimized MySQL database queries, improving efficiency of product management.

Mizaj Website [Link](#)

- Designed and developed a flexible layout food-ordering website focusing on UI/UX.
- Built a frontend structure ready for backend integration.

EDUCATION

Master in Computer Science, Sohag University

Apr '25 — Present

Bachelor of Computers and Information in Bioinformatics, Assiut University (GPA: 3.65 / 4.0)

Sep '19 — Jul '23

COURSES

Building Web Applications using PHP & MYSQL, Mahara Tech.

React.js, Mahara Tech.

Introduction To Web Technologies, Information Technology Institute (ITI).
